

Company President Presents White Paper at ISA Symposium in Orlando, FL

ISA Water/Wasterwater Symposium - August 7-9, 2012 Orlando, FL

Over 165 instrumentation, automation and SCADA professionals came to a packed house to share ideas, learn, and network. Imagine Instruments President, and ISA member Michael Macchiarelli along with other industry experts presented current, up-to-date information and application examples on a range on topics over the three day event. Michael's presentation on "Solar Powered Sensors & Instrumentation" provided attendees with detailed information on what makes up an Off-grid Solar Power System and how it can be used to power sensors and instrumentation in remote applications. A solar powered tank level transmitter application was provided.
