

Model: LP1S3-90-DR

Lightning / Surge Protector

FEATURES & BENEFITS

- Compact, Din-rail Mounted Design
- Protects Signal, Supply and Shield Lines
- Gas Discharge Tube Design

APPLICATIONS

- For load Cells, Strain Gauges and RTDs
- Perfect for Weigh Stations and Weighbridges

DESCRIPTION

Model LP1S3-90-DR is a single stage din-rail mounted surge protector. This model is designed for use with resistance temperature detectors (RTDs), load cells, weighbridges, and strain gauge sensors. The unit provides maximum protection on the signal lines, excitation, sense lines and shield.

SPECIFICATIONS

- Clamping Voltage: ± 90 Volts
- Connection: Screw terminal
- Enclosure: Din-rail Polycarbonate
- Operating temperature: $-40 - 180$ °F ($-40 - 82$ °C)
